

PRECISION MECHANICAL APPLICATIONS PRECISIONKICKOVER

MAKING INTERVENTION
SMARTER

The **PrecisionKickover** is used in combination with the **PrecisionStroker** to install and retrieve valves in side pocket mandrels, improving both the tool orientation and kick over mechanisms in highly deviated and horizontal wellbores.

APPLICATIONS

- Retrieval and installation of valves inside pocket mandrels

FEATURES

- Real time confirmation of the retrieval and installation
- Precise positioning - correlation with CCL
- Improved tool orientation
- Reinforced kickover mechanism
- Modification kits for SLB OM-1/OM-5 series
- Combinable with **PowerTrac**® for conveyance

BENEFITS

- Improved reliability and operational efficiency in highly deviated wells

SERVICE NAME	MODIFIED KOT
Available sizes	3.50"/4.50"/5.50"/7.00"
Pressure rating	20,000 psi / 1,379 bar
Temperature rating	177°C / 350°F
