

PROCESS

75kw hydraulic flushing unit

MAKING INTERVENTION
SMARTER

4 pole, 75Kw EExde Motor close coupled to a variable displacement piston pump

Weight Data

Total Weight 3,000kg

Dimensions

Length 2,500mm

Width 2,000mm

Height 2,000mm

APPLICATIONS

- Pump output: 320 l/min, 60 Bar @ 1800rpm (60 Hz)
- Electrical requirements: 440v, 3 phase, 60 Hz
- Oil capacity: 2000 litres

FEATURES

- Suction & return filtration ensure maximum protection for both the pump and connected tools.
- Adjustable hydraulic oil immersion heaters and interchangeable filter elements allow customisation of the unit dependant on customer requirements.
- Low oil level, high oil temperature & low return line flow safety shutdowns.
- Housed within a DNV 2.7-1 frame

BENEFITS

- Certified against current ATEX & Norsok legislation for use in Zone I hazardous areas
