

COILED TUBING & PUMPING

TREATING IRON

MAKING INTERVENTION
SMARTER

We hold an extensive inventory of treating iron, HP and LP hose packages and associated ancillary equipment required for the safe and effective provision of service. All relevant equipment meets current legislative requirements including PED (Pressure Equipment Directive).

APPLICATIONS

- Flexible packages can be supplied to suit operations on an item or package basis as required

FEATURES

- All equipment is housed in containers for ease of manual handling and safe storage of all components
- All items are separately identified by use of a stainless steel identification band with unique identification details including pressure, size, rating and weight
- All items over 25kg are identified with a yellow stripe as per our manual handling guidelines to alert the company and other personnel

BENEFITS

- Full specification available including H2S, 10,000psi rated and 15,000psi rated equipment
- Specialist items can be provided via our suppliers if needed
